To The Secretary to the Government of Madras,

Development Department.

Sir,

Ref:- Government Memorandum No.19243-VI/40-2 Development dated 16th September 1940.

I invite attention to the petition dated 8th April 1940 of the Villagers of Yerumal, a copy of which was submitted to Government with Dr.Sundara Raj's letter No.1170-C/40-1 dated 27th April 1940. The proposal is an imperative and necessary one in view of the fact that the school started by the fishermen of the locality will have to be closed if it is not taken over by the Government.

A

2/

The number of pupils studying in the school is 101. The strength in Standard IV is less than 25 per cent of the strength in I Standard and in — under the Educational Rules the school stands to be penalised. The Deputy states that the proposal is an imperative and necessary one in view of the fact that the school will have to be closed if it is not taken over by the Govt. As already noted, the closure of this school will not deprive the fisher children of educational facilities as there is an aided school within three furlongs. It is for orders whether the Director's proposal will be accepted. If no, the remarks of Inspector may be invited.

R. reading from previous notes does not help in the least. What are the concessions which fisher children get in fisheries schools which they will not in ordinary schools? If they do not stand to lose, the obvious course is to make them go to the aided school

A

nearby. I have already raised this point in another file. K on p. 6 of (P) does not throw any light on the matter. Now examine.

23.10.40

To L.S.

With reference to 'A' on p. 2 above it is submitted that the fisher children get in fisheries schools

(1) instruction on fishery subjects;

(2) free education; and

(3) free supply of slates, books and stationery articles for needlework for the use of pupils in the schools.

Item (1) above will not be available in other recognised schools. Free education will be available in local boards' schools. But in private aided schools the fisher children will have to pay fees. They will not have item (3) also in schools other than fisheries schools. The aided school near the school at Yermal referred to at p. 2 above is a private one and the fisher children will not get any of the concessions mentioned above. For the private school at Yermal proposed to be taken over, fees are collected from the pupils (fisher children) and no special education on 'Fisheries' is provided. There is

4 20.

also no free supply of slates etc. for the pupils in this school.

2 In the file relating to the question of continuance of teaching of English in standards IV and V in fisheries schools, the Finance Dept. have suggested that a report may be called for and examined as to whether the fisheries schools which are situated near other recognised schools may not be closed. The connected file has been sent to Edn. Dept. and on return of the file the D. I. will be consulted on the Fin. Dept.'s suggestion mentioned above. Sep. file

~~In another~~ A petition has since been received containing some suggestions in regard to the Fisheries Dept. and one of them is the transfer of control of fisheries schools to private management. The petition has been referred to the D. I. and his remarks are awaited. In these circumstances it is for orders whether the proposal for the taking over of the School as aforesaid is to need be considered as a Part II scheme. If so the case may be sent to Finance for remarks.

There fisheries schools ~~are~~ provide elementary vocational training - the children are taught, among other things, net-making the splicing by hand of the yarn they require for fishing.

I am not prepared to argue that it makes no difference if they go to the ordinary elementary school where they will get no vocational training at all & will be educated away from the fishing industry. I think it is of considerable importance that they should be made ~~both~~ literate & at the same time not lose all aptitude for earning a living by fishing. The Directors ~~scheme~~ proposal may go forward

Part II scheme for 1941-42.

Taking over the management of the Elementary school at Yerumal under the control of the Fisheries Dept.

ASSISTANT SECRETARY TO GOVERNMENT
5 NOV 1940
FINANCE DEPT.

The proposal involves an extra cost of Rs 1,258 p.a (Rs 928 recurring and Rs 330 non-recurring) The provision required for the purpose in 1941-42 is Rs 900.

2. It is seen that the school is being conducted from 1-7-1938. It was stated in the petition praying for taking over the school under the control of the Fisheries Department that the fishermen had constructed a new building by raising loans. It is presumed that the building and the furniture and books and apparatus will be handed over to the Fisheries Department for conducting the school. If so there will be no need to provide for the non-recurring expenditure of Rs 330 and for rent for the building (Rs 90).

3. Subject to the above remarks, this department may, in the circumstances noted by A_2 on p.5 ante, agree

To U.S.

Para. 2 of the Fin.Dept. note on p.6 above.

As regards rent for the school building it is submitted that the D.F. was asked to report last year whether the fishermen would place the building at the disposal of Govt. free of rent for running the school. The Director replied that the fishermen represented that they constructed the building at a very heavy cost and that much of it was borrowed amount and requested that a reasonable rent might be paid. Hence provision has been made for the payment of rent. It does not seem necessary to ask the Director again on this question. Fin orders.

2. As regards books and apparatus and furniture the requirements of a new school ~~etc.~~ have been estimated at Rs.400/. For the Yerumal school proposed to be taken over, the Director suggested only a provision of Rs.330. However he may be consulted on the point raised by Finance in regard to these items.

3. Subject to orders a draft O.M. is submitted.

NOTE BY THE ADMINISTRATIVE DEPARTMENT.

The fishermen of Yerumal in the South Kanara district started a school in July 1938. It caters to the needs of three fishing hamlets. On a petition received from these fishermen, the Director of Fisheries proposed that the school might be taken over by the Government. The proposal was not sanctioned. In April last the fishermen represented that on account of their poverty they would be forced to close down the school if it was not taken over by the Fisheries Department. The Government thereupon ordered that the proposal should be submitted for consideration as a Part II Scheme for 1941-42. The Director of Industries and Commerce has now renewed the proposal.

12
28

2. The fisheries schools provide elementary vocational training which is different from that given in the ordinary schools and it is of considerable importance that the children of the fishermen community should be made literate and at the same time not lose all aptitude for earning a living by fishing. This Department therefore supports the Director's proposal and recommends the inclusion of necessary provision in the Budget Estimate for 1941-42 as indicated in the summary above. The school with a staff of two teachers will be continued on a temporary basis for two years to start with.

C.P.Karunakara Menon,
6-12-40.

NOTE BY THE FINANCE DEPARTMENT.

The proposal may be considered as a Part II Scheme for 1941-42.

Education - Fisheries School - Yerumal (South Kanara district)- Taking over.

ENCLOSURES.

No.

Spare copies

Ref. No. 1920-F.C/40-13

Station Madras, *Dated the* 4th August 1941.

From (Name) L.B. Green Esq., O.B.E.,

(Designation) Director of Industries and Commerce,

To The Secretary to the Government of Madras,

Development Department.

Sir,

(T) Reference.- G.O.No. Ms.583, Development dated 22nd - March 1941.

A In the G.O. quoted above, the Government sanctioned the proposal for the department to take over the management of the school at Yerumal with effect from 1st June 1941 on a temporary basis. This sanction has not been availed of so far as the District Educational Officer, South Kanara, stated that as a separate school for fisher children in the locality did not seem to be necessary, the school need not be taken over by the Fisheries Department. The Sub Assistant Director asked him to reconsider the matter in view of the fact that the Junior Deputy Inspector of Schools had stated in 1938 that a school for the children of the fishermen community was necessary in that locality, but the District - Educational Officer has replied that he is unable to reconsider the matter. Thereupon I addressed the Director of Public Instruction in the matter pointing out that the proposal to take over the management of the school was based on the recommendation of the officers of the Education -

Department,

Department, that the Government had sanctioned the taking over of the school and that, the fishermen of the locality were keen on having a Fisheries school there. He has replied that there is no need for a separate school for the fisher children in the locality. A copy of his letter dated 9th June 1941 is enclosed.

2. The Director of Public Instruction states that the number of fishermen children in the locality is small and that they can be easily provided for in the existing aided elementary school within about two furlongs. In a petition dated 13th August 1938 signed by 13 fishermen of Yerumal, it was stated that there were nearly 100 fisher boys and 100 fisher girls of school-going age in their fishing hamlet. The Inspector of Fisheries, Mangalore reported on 24th October 1939 that out of a total of 256 fisher-children of school-going age in the locality, 125 were not attending any school. The strength of the school proposed to be taken over was reported to be 100 on 7th October 1939, and 101 on 28th August 1940. Thus it will be seen that the number of fisher children in the locality is not small and that the aided school with a strength of over 100 pupils cannot, in addition, efficiently cater for the 101 pupils now attending the fishermen school and to the 125 children of school going age in the three fishing hamlets of Yerumal, Sanna Yerumal and Uchil not attending any school at all. There were only 18 children of the fisher community in the aided school prior to the opening of the school by fishermen and their attendance was reported to be very irregular. It is the type of Fisheries education that fisher children require and the employment of a fisherman teacher would not be sufficient in itself to induce the fisher children to attend the aided school where the curriculum of studies differs from that of fisheries schools. In the circumstances, I consider that it is desirable to have a separate school for fisher children in the locality and request that the Director of Public Instruction may be asked to waive his objection to the taking over of the school by the department.

3. In this connection, I enclose copies of correspondence which passed between the Secretary of the Sri Gnanodaya Samaj, Mangalore, and the Director of Public Instruction on the one hand, and between the Samaj and the Divisional Inspector of Schools, Coimbatore on the other, on the subject of the opening of a school at Yerumal.

Director of Industries and Commerce.

Copy of letter Dis.No.2404/41 dated 9th June 1941 from the Director of Public Instruction, Madras.

Subject.- Elementary Education - Other institutions - Fisheries school, Yerumal--South Kanara District- Taking over by the Department of Fisheries- Not approved.

Ref: Your letter No.1920-C/40-11 dated 25.4.1941.

It is observed that the number of fishermen children in the locality is small and that they can be easily provided for in the existing aided elementary school within about two furlongs. Besides, the manager of the aided school promises to appoint a fisherman teacher in his school and to improve its accommodation, if necessary. I, therefore, consider that there is no need for a separate school for the fisherman children in the locality.

Copy of letter dated 23-2-39 from Mr.B.M.Thingalaya,Secretary, Srignanodaya Samaj to the Director of Public Instruction,Madras.

The present rule is that no school should or could be opened within the radius of one mile of any existing schools and I feel constrained to submit this note by being strictly enforced prevents Fisheries schools being opened in centres where they are absolutely necessary.

I need hardly submit that Fisheries school stand on a different footing than other schools and restrictions now put upon the opening of such schools greatly inconvenience our children and deprive them of the benefits of Fisheries education.

While thanking the Government for the many considerations and concessions extended to this poor community, I beg to request on behalf of the Fishermen community that the above rule may be relaxed in the case of Fisheries schools which are opened near any existing general schools and they may be restricted for the use of Fisheries students exclusively which will in no way clash with the interest of the existing schools.

Copy of Proceedings of the Director of Public Instruction N.Dis.840B/39 dated 27-2-1939.

Read:-- From the Secretary,Srignanodaya Samaj, Mangalore dated 20-2-39 - Fisheries school - Rules of location - distance of limits from existing schools - Relaxation.

Transferred to the Divisional Inspector of Schools, Coimbatore.

Copy of letter dated 23-4-39 from the Divisional Inspector of Schools, Coimbatore to the Secretary, Srignanodaya Samaj, Mangalore.

Cases of difficulties if any, due to the application of the rule may kindly be brought to my notice as and when they come up.

Copy of letter dated 24-5-39 from the Secretary,Srignanodaya Samaj to the Divisional Inspector of Schools,Coimbatore.

I am in receipt of your kind communication referred to above and thank you for same. Yerumal Bada Grama, a fishing village, Udipi Taluk on the coast line, with a large fisher - community has been suffering for want of a Fisheries school. In a small unrecognised school in the village there are at present about 60 studdnts of the community. When the fisher residents of the village wrote for opening a Fisheries school there, the teacher manager of Sri Vidya Probodhini - Elementary school of Yerumal which is about ¾ of mile distance for the centre of the fisherfolk community raised a hue and cry with the request no recognition was granted, although not a single fisherfolk boy attends the school.

The aided school useful as it may be, for boys of other

community

community is practically of no use for the children of fisherfolk of the village and the community has therefore to suffer for no fault of theirs.

The opening of a Fisheries school with restriction to admit no other boys excepting those belonging to the fisherfolk community will in no way affect the existing aided school. His objections are more imaginary than real and are based on the rule pertaining to distance to be maintained between two schools. This is a typical case where the relaxation of the rules is absolutely necessary.

When other cases of this nature occur, I shall place them before you.

I pray necessary orders may be passed with respect of opening a Fisheries school in the above Yerumal Bada grama fishing village exclusively for the use of the children of the community.

Soliciting the favour of orders.

Copy of letter No.L.Dis.662/39 dated 8-8-39 from the Divisional Inspector of Schools, Coimbatore to the Secretary, Srignanodaya Samaj. Mangalore.

I understand that the new school at Yerumal Badagrama has been recommended to be taken over by the Fisheries Department.

Sub. Education - Fisheries School Yervamal.

Ref. From the D.I.E. no. 1920 F.C./40-13 d. 4.8.41.

In G.O. no. 583 Dw. d. 22.3.41 the Govt. sanctioned the taking over of the fisheries school at Yervamal by the dept. of Industries and Commerce. The Director of Public Instruction has since objected to the proposal on the ground that the fisheries children of Yervamal can be provided for in the existing aided elementary school in the locality. The Govt. have re-examined the question and consider that a separate fisheries school at Yervamal is necessary. The orders in G.O. 583 Dw. dt. 22.3.41 should be given effect to without further delay.

DEVELOPMENT DEPARTMENT.

Sub:- Education - Fisheries School -Yerumal (South Kanara District) - Taking over.

From the D.I.& C., No.1920-F.C/40-13, dated 4-8-41.

(C.No.20912-E/41)

To D.S.

The fishermen of Yerumal in South Kanara District started a school in 1938. It caters to the needs of three fishing hamlets of Yerumal, Sanna Yerumal and Uchil. In 1939, on a petition received from these fishermen, the D.I.& C. proposed that the school might be taken over by the Government. The Dist Educational Officer, South Kanara, reported on 31.7.39 that the school might be taken over by the Fisheries Department subject to the condition that only fisher-children were admitted into the school. The Government however deferred the consideration of taking over the school till restoration of normal times. In 1940 the fishermen represented that on account of their poverty, they would be forced to close down the school if it was not taken over by the Fisheries Department. The proposal was considered as a Part II Scheme for 1941-42 and sanctioned with effect from 1-6-1941. Necessary provision has been made in the budget for 1941-42. The D.I.& C. now reports that the sanction has not been availed of so far, as the D.E.O., South Kanara, stated that as a separate school for fisher-children in the locality did not seem to be necessary, the school need not be taken over by the Fisheries Department. The Director of Public Instruction states that the number of fisher-children in the locality is small and that they can be easily provided for in the existing aided elementary school within about two furlongs. In 1939 the number of fisher-children of school-going age was estimated at 256. The strength of the fishermen school was 101 and 125 children were not attending any

£9/52

school at all. The strength of the aided elementary school was over 100. Thus, the D.I.& C. points out that the number of fisher-children in the locality is not small and that the aided school with a strength of over 100 pupils, cannot, in addition, efficiently cater to the needs of 101 pupils now attending the fishermen school and to the 125 fisher-children of school going age in the three hamlets not attending any school at all.

2. While ordering the taking over of the fishermen school by the Fisheries Department with effect from 1-6-1941, the existence of the aided school in the locality was taken into consideration. It was observed that the following special advantages which the fisher-children have in fisheries school are not available in the aided school:-

(1) instruction on fisheries subjects,

(2) free education, and

(3) free supply of slates, books and stationery and article for needle work for the use of pupils in the school. In the same connection, the Second Adviser to H.E. recorded the following minute:-

"These fisheries schools provide elementary vocational training - the children are taught among other things, net-making and the spinning by hand of the yarn they require for fishing.

I am not prepared to agree that it makes no difference if they go to the ordinary elementary school where they will get no vocational training at all and will be educated away from the fishing industry. I think it is of considerable importance that they should be made literate and at the same time not lose all aptitude for earning a living by fishing. The Director's ~~expert~~ proposal may go forward."

3. In these circumstances it is for consideration whether the Director of Public Instruction may be asked

to waive his objection to the taking over of the school by the Fisheries Department, as suggested by the D.I & C. The remarks of Edn. & P.H. Department may be invited.

R.C. No. 4207 B/41

Station Madras, *Dated the* 18th Octr. 1941 19

From (Name) R.M.Statham Esq., M.A., C.I.E.,

(Designation) Director of Public Instruction

To The Secretary to the Government of Madras,

EDUCATION & PUBLIC HEALTH Department.

Sir,

With reference to the Government Memo No 20912 E/41-3, Development Department, dated 10th September 1941 forwarded to me in Education and Public Health Endorsement No. 36048 A-1, dated 17th September 1941, I have the honour respectfully to protest against the Department of Industries and Commerce taking over the control of the unrecognised private school for the children of fisher~~ies~~men at Yerumal. The facts of the case are as follows:-

2. In the village there is already an aided school within a distance of 1½ ~~mile~~ furlongs from the fisherman school in question. This has been in existence for the last ten years. The Manager of the school has even promised to appoint also a fisherman teacher in his school and to improve the accommodation so as to make provision for the education of the children of the fishermen in the locality whose number is small consisting only of 27 boys and 30 girls of school-age. The Manager of the aided school has already lodged a protest against the new school as it is feared that the existence of the new school will prejudicially affect his school.

21/40/

3. I should like to point out also that in the syllabus for the lower standards there is and can be very little difference between an ordinary school and a fisheries school. In this connection I invite your attention to my letter R.C.No. 152 B/32, dated 8th April 1936. Even if there are slight variations, the need for a separate school does not exist in this locality as the manager has expressed his willingness to appoint a fisherman teacher in his school and as the number of fisherman children is very small. Two schools in the same locality under two different agencies where one could serve would lead not only to overlapping of educational effort but to a waste of public funds. If the aided school in the village is improved so as to admit the children of fisherman community there will be a slight increase in the amount of teaching grant payable to the school. But the proposal to run a separate fisheries school is expected to cost the Government about Rs 700/- a year and this in my opinion is a sheer waste.

121-733 G.O 2182 2.12

10 1/4/41

4. I therefore recommend that the orders of the Government may be reconsidered and the Director of Industries and Commerce instructed not ~~take~~ to take over the management of the private fisheries school at Yerumal under his control. Just before the issue of the Government Memo in question when he consulted me in the matter I definitely told him that there was no need for a separate school for the ~~xxx~~ fishermen -- children in the locality and he should have taken my advice and acted on it with reference to G.O.No. 2182 Development Dept dated 2-12-1936. I do not understand how he was able to convince the Government that a separate school was necessary for the community in the village.

(P)

I have the honour to be,
Sir,
Your most obedient servant,

Ref. No. 2786-F.C/41-2

Station Madras , *Dated the* 29th November 1941.

From (Name) P. Madhava Menon Esq., I.C.S.,

(Designation) Joint Director of Industries and Commerce,

To The Secretary to the Government of Madras.

Development Department.

Sir,

Reference.- Government Endorsement No.29657-E/41-1 dated 3rd November 1941.

The Director of Public Instruction recommends a reconsideration of the orders of Government passed in their Memorandum No.20912-E/4-3 dated 10th September 1941 for the following reasons:--

(i) there is already an aided school within a distance of 1½ furlongs from the fishermen school in question.

(ii) the Manager of the aided school has promised to appoint a fisherman teacher in his school and to improve the accommodation so as to make provision for the education of children of the fishermen in the locality whose number is small consisting of only 27 boys and 30 girls of school-going age:

(iii) the Manager of the aided school has already lodged a protest against the new school as it feared that the existence of the new school will prejudicially affect his school:

P.t.o.

(iv) in the syllabus for the lower standards there is and can be very little difference between an ordinary school and a fisheries school and even if there are slight variations, the need for a separate school does not exist in this locality;

(v) two schools in the same locality under two different agencies where one could serve would lead not only to over-lapping of educational effort but to a waste of public funds:

(vi) if the aided school in the village is improved so as to admit the children of fishermen community, there will be a slight increase in the amount of teaching grant payable to the school. But the proposal to run a separate fisheries school is expected to cost the Government about Rs.700/- a year which, in the opinion of the Director of Public Instruction is a sheer waste.

The above statements are examined below:

2. Item (i). According to the report of the Inspector of Fisheries, Mangalore the aided school is within three furlongs from the fishermen school -- vide paragraph 2(3) of letter No.2411-C/38-5 dated 18th August 1939 of the Director of Fisheries. K/ not pertinent

Item (ii). As already reported in paragraph 2 of Mr.Green's letter dated 4th August 1941, No.1920-FC/40-13, the number of fisher-children of school-going age in the three fishing hamlets of Yerumal, Sanna Yerumal and Uchil, for whose benefit the fisheries school at Yerumal is intended is 256, i.e.131 boys and 125 girls, of which 131 were attending school and 125 were not attending any school. The strength of the fisheries school at Yerumal as it stood on 7th October 1939 was 100, 65 boys and 35 girls, distributed in five standards. The strength of this school on 28-8-1940, when the Inspector of Fisheries, Mangalore, visited it, was 101, 66 boys and 35 girls. The statement of the Director of Public Instruction that there are only 27 boys and 37 girls of school-going age in the locality cannot therefore be correct. The strength of the aided school in July 1938 was 106 which included 18 fisher children. This school, therefore, with already a strength of over 100 pupils, cannot, in addition, cater to the 101 fisher pupils now attending the Fisheries school and the 125 children of school-going age in the above three fishing hamlets not attending any school, unless the school is expanded to more than twice its existing capacity. The proposed appointment of a fisherman teacher is not, therefore, likely to improve matters as this appointment by itself is not likely to induce fisher children to attend the aided school whose curriculum of studies is different from that of a fishery school. The teacher manager of the aided school, Sri Y. Shiva Rao, in one of his petitions dated 10th July 1940 stated as follows:-- | B | A | C

" the population of the area being mainly of fishermen community, chances for a Fisheries school are promising. The school census of the locality shows that about 80% of the school age children are of the community referred to above . . . . . Although it is reasonable to give a Fisheries school for the locality, in consideration of the large number of fisher population, it is unreasonable to undo my school which was opened first and a considerable amount was spent for the cause of education."

Item (iii). The protest of the Manager of the aided school is not a new one. As early as 7th July 1938, he had lodged his first protest and the Junior Deputy Inspector of Schools stated that a school for the children of the fishermen community was necessary at Yerumal and hoped that the Fisheries Department would take over the management of the fishermen school. From

the

the figures already furnished, it is clear that the fears then expressed by the Teacher-Manager of the aided school were unfounded. Even as late as 24th May 1939, the Secretary, Sri Gnanodaya Samaj, Mangalore, pointed out to the Divisional Inspector of Schools, Coimbatore, that not a single fisher boy attended the aided school, that the aided school was practically of no use for the children of fisherfolk and that the opening of a fisheries school with restriction to admit no other boys excepting those belonging to the fisherfolk community would in no way affect the existing aided school and the Divisional - Inspector of Schools, in his letter L.Dis.662/39 dated 8-8-1939 replied to the Secretary of the Sri Gnanodaya Samaj as follows:--

" I understand that the new school at Yerumal Badagrama has been recommended to be taken over by the Fisheries Department".

In any case the question is not one to be decided only on the protest of the Manager of the aided school. The necessity or otherwise of a Fishery school has to be determined by an examination of other relevant factors.

Item (iv). The Director of Public Instruction himself admits that there are slight variations between the syllabus in an ordinary school and a fisheries school but states that the need for a separate school does not existx in the locality as the Manager has expressed his willingness to appoint a fisherman teacher in his school and as the number of fishermen children is very small. These points have been already dealt with under item (ii) above. The number of fisher-folk children in the locality is by no means small.

Item (v). So long as there is scope, as explained above, for a fisheries school and there is the understanding that the Fisheries school will not admit pupils of castes other than fishermen, there is no point in the argument of the Director of Public Instruction that the fisheries school and the aided school would lead not only to overlapping of educational effort but to a waste of public funds. Though the aided school has been in existence for the last 10 years and though there were more than 200 fisher children of the school going age in that locality, only 18 fisher children were on the rolls of the aided school and even their attendance was not regular. The local fishermen community has expressed a strong desire for the establishment of a Government fishery school in that place. These facts clearly show the need for a separate fisheries school in the locality and the expenditure on it can hardly be described as a "waste of public funds". On the other hand it is a legitimate charge on the public funds.

Item (vi). It has already been pointed out above how it is very unlikely that the aided school will be able to cater to the needs of the fisher children in the locality whose number is estimated to be over 200, in addition to the 100 and odd children who now attend the aided school.

3. Mr. Green's letter No.1920-F.C/40-13 dated 4th August 1941 already referred to contains answers to most of the points raised in the present letter of the Director of Public Instruction and if he had seen this letter he would probably not have asked for a reconsideration of the orders passed by Government in their Memorandum No.20912-E/41-3 dated 10th September 1941.

OFFICE OF THE
DIRECTOR OF PUBLIC INSTRUCTION,
M A D R A S.

R.O.C. No. 4207 B/41, dated 27th December 1941.

SUBJECT: Elementary Education - Fisheries School at Yerumal: (South Kanara Dt.)

47-8 inte REFERENCE: Government Memorandum No. 49321 A.1, Education, dated 13th December 1941.

******

S u b m i t t e d.

2. In the circumstances stated by the Joint Director of Industries and Commerce, I withdraw my objection to the establishment of the Fisheries School at Yerumal. I may, however, add that I have inspected several Fisheries schools personally both before and recently and I consider that this overlapping of effort is quite unnecessary and that the ordinary schools should be able to cater to the needs of the children of fishermen, just as much as the needs of the children of the other backward communities.

36 (T) 3. Mr. Green's letter referred to in the concluding paragraph of the letter from the Joint Director of Industries has not been received in this office.

For DIRECTOR OF PUBLIC INSTRUCTION.

Education. Fisheries School. Veraval
Taking over. Objection.

From the D. P. I. no. 4207 B/41 dt 18/10/41
Govt. Endt. no. 29657 E/41-1 dt. 3.11.41.
From the D. I & C. no. 2788 F.C./41-2 dt. 29/11/41
To D.S.

In March 1941 the Govt. ordered the taking over of the private fishermen School at Veraval by the Dept. of Industries and Commerce. In August last the D. I & C. reported that the Govt order was not given effect to as the education department objected to this taking over the School. The matter was examined in Consultation with the Education and P.H. Dept. and the D. I & C. and the D. P. I were informed of the necessity of a separate Fisheries School at Veraval. The D. I & C. was asked to give effect to the orders of the Govt. without further delay. The orders of the Govt. do not seem to have been given effect to till now as the D. P. I. is persisting in his protest against the proposal. The grounds of objection of the D. P. I. are enumerated in para. 1 of the D. I & C's letter dt. 29.11.41. The D. I & C has met each of the D. P. I's

4/12/41

objection in para 2 of his letter dated. The arguments of the D.D.T.C are convincing and there seems to be no case for reconsidering the previous orders of the Govt.. The remarks of the Edn. and P. H. Deptt.. may be invited.

DIRECTOR HEALTH DEPT.

Edn. dept (A) Deptt

The question is whether a separate school for fisher-children is necessary or not and whether the existing aided school will not cater to the needs of these children. The development deptt. consider that a separate school is necessary. Our deptt need not object.

Please see the note on para ①
